

# DID YOU KNOW

## YOUR MERCHANTS CAN MANAGE MULTIPLE MIDS USING A SINGLE GATEWAY ACCOUNT?

Sometimes, one is enough—in the case of our payment gateway technology, one gateway account is all your merchants need, regardless of how many MIDs they have.

Different kinds of merchants need multiple MIDs for a variety of reasons, but one fact remains constant, regardless of what business your merchants are in: dealing with more than one gateway account is inefficient and, thanks to our technology, it's unnecessary.

The gateway's unique system architecture allows your merchant customers to manage a virtually unlimited number of MIDs on a single gateway account, giving them the ability to log into one account and see all their MIDs in one place.

And it's more than just easy access to MIDs
