

Payment processing you can rely on

“Square is simple to deploy, activate, and, of course, simple for our staff and our customers to use. The whole system is easy for us to manage. Compared to a traditional point of sale, with Square we also have opportunities for additional integrations, data reporting and the information we need about sales in real time.”

Janette Smrcka,
VP Information Technology, SoFi Stadium

Reasons to partner with Square

Secure products

Transparent rates

Omnichannel payments

End-to-end management

Protect your business with built-in security.

Safeguard your data with end-to-end encrypted products. Plus, fraud detection and dispute management come at no additional cost.

Business owners have saved **\$330 million since 2011 by using Square** to manage and win their disputes.

\$40,000+ saved per year by switching to Square*

\$3,000

saved in monthly fees and PCI compliance

\$7,219

saved in refund and processing fees

\$25,000

saved in employees' time from responding to disputes, ensuring compliance, and managing vendors

\$3,000

saved in chargeback fees

**The example cost savings is based on a real Square business. Our seller owns a retail business with annual sales of \$20M, averaging \$114 per sale.*

Feel confident with transparent prices.

Plan your finances and know exactly what you'll pay. There are no hidden fees or lock-in contracts required, so you can stay on top of your money management.

Here's a breakdown of how Square processing fees work using a blended rate, so you can see where the money goes every time you make a sale.

Let's say a customer pays \$100.

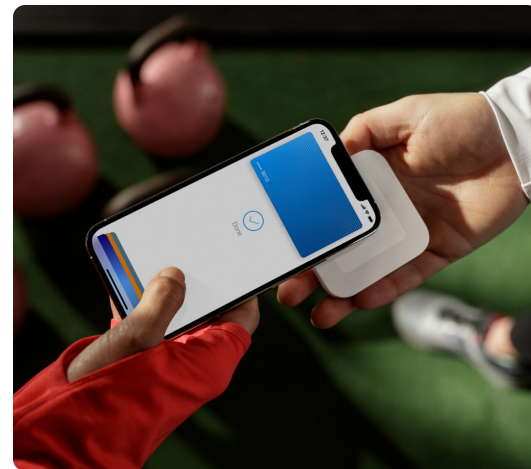

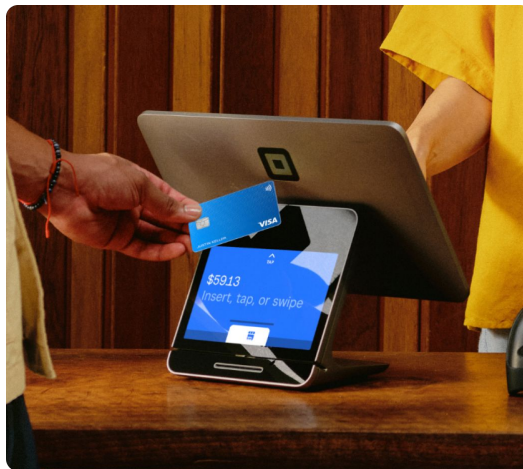

How Square processing fees work*

Accept payments anywhere.

Take payments wherever you are and however your customers like to pay, whether in person, on the go, or online.

Choose from user-friendly, sleek hardware that fits your business or use our online and remote payment solutions.

Manage your sales from one place.

Combine your point of sale and processing with support and protection for every step of your payment process.

Process sales with secure hardware and integrated software. Track it all with real-time reporting so you manage and grow your business.

Square makes it quick and easy to take payments.

Square process

YOUR CHOICE

- 1 Make an account
- 2 Account gets approved
- 3 Find the perfect POS
Purchase hardware, set up POS app, take payments online or remotely — whatever works for you.
- 4 Access account instantly
Includes secure transactions, credit card processing, and 1–2 business day transfers
- 5 Start taking payments

Usual bank process

- 1 You must have a business account and license
- 2 Apply for a merchant account
- 3 Merchant account gets approved
- 4 Bank or third-party service bundle
- 5 Get hardware and software
Sold as one package but from different companies
- 6 Set up hardware and software
Spend out of pocket if you need help with set up
- 7 Start taking payments
Reach out to networks individually if major credits cards aren't accepted
- 8 Ensure you're PCI compliant

Manage and take responsibility for PCI compliance.
